

From

```
1 #import "@preview/crudo:0.1.1"
```

typ

```
2
```

and

```
1 #crudo.r2l(``c
```

typ

```
2 int main() {
```

```
3     return 0;
```

```
4 }
```

```
5 ``)
```

we get

```
1 #import "@preview/crudo:0.1.1"
```

typ

```
2
```

```
3 #crudo.r2l(``c
```

```
4 int main() {
```

```
5     return 0;
```

```
6 }
```

```
7 ``)
```

If you execute that, you get

```
(  
  ("int main() {", "    return 0;", "}"),  
  (block: true, lang: "c"),  
)
```
