```
From
```

```
1 #import "@preview/crudo:0.1.0"
                                             typ
2
and
 1 #crudo.r2l(```c
                                             typ
2 int main() {
3 return 0;
4 }
5 ```)
we get
   #import "@preview/crudo:0.1.0"
 1
2
3 #crudo.r2l(```c
4 int main() {
5 return 0;
6 }
7 ```)
If you execute that, you get
(
  ("int main() {", " return 0;", "}"),
  (block: true, lang: "c"),
)
```
